

Corporate Background

Ingenuity® Systems is a leading provider of information solutions for the exploration, interpretation, and analysis of experimental data for life sciences researchers. Ingenuity Systems is recognized as a technology leader, providing complete solutions for researchers to better understand the complex systems foundational to human health and disease.

Addressing Key Challenges Facing Life Scientists

Life sciences researchers are continually striving to develop a better understanding of the underlying molecular causes of disease. While researchers have been able to successfully generate large amounts of experimental data using a wide range of technologies, there are still significant challenges to understanding complex biological and chemical relationships within experimental data or models, and integrating biological information from multiple data types and sources.

Ingenuity's Solutions

Ingenuity's products and services have one common goal — to help life science researchers generate maximum value from all types of biological and chemical knowledge. All of Ingenuity's solutions leverage the Ingenuity® Knowledge Base, a repository of biological interactions and functional annotations created from millions of individually modeled relationships between proteins, genes, complexes, cells, tissues, drugs, and diseases. These modeled relationships, or Findings, include rich contextual details, links to the original article, and are manually reviewed for accuracy. Ingenuity's solutions enable researchers to quickly access and utilize this knowledge to better understand complex biological systems, answer questions, analyze data, or integrate that information into other tools.

- **IPA®:** Web-based software to help researchers model, analyze, and understand the complex biological and chemical systems at the core of life science research.
- **Ingenuity® Answers:** Web-based software that enables users to quickly answer broad or very detailed biological and chemical questions by leveraging the knowledge and relationships in the Ingenuity Knowledge Base.
- **Ingenuity Analysis Services:** Services that leverage the power of Ingenuity solutions to analyze data or explore experimental systems.
- **Other Solutions:** Ingenuity also has informatics solutions for bioinformaticists, enterprise solutions for global pharmaceutical companies, and ecommerce solutions for life science suppliers.

How We Are Different

Superior Life Science Knowledge: Ingenuity's solutions leverage the unparalleled depth and breadth of the information in the Ingenuity Knowledge Base. Ingenuity manually reviews this information for accuracy and structures it to enable a contextually detailed representation of biological knowledge that is semantically and linguistically consistent.

Industry Standard: To date, Ingenuity solutions have been cited in thousands of articles in the peer-reviewed scientific literature. IPA has been adopted by virtually all major pharmaceutical companies and hundreds of industry-leading biotech, academic, and government institutions.

Easy to Use: Our products have been designed with the help of usability experts to meet the needs of biologists and chemists in addition to computationally oriented researchers. They have been adopted by thousands of life scientists across a wide range of therapeutic areas.

World-Class Support: Ingenuity relies on a global team of accessible and responsive scientists, software developers, and Ph.D. level technical and support scientists who provide comprehensive product support to all customers.

HEADQUARTERS
Redwood City, California

LOCATIONS
Offices in France, Switzerland, and the United Kingdom.
Distributors in Australia, Japan, Singapore, South Korea, and Taiwan

MANAGEMENT TEAM

Jake Leschly, *President and Chief Executive Officer*

Doug Bassett, Ph.D., *Chief Scientific Officer and Chief Technology Officer*

Peter DiLaura, *Senior Vice President, Products and Marketing*

Ramon Felciano, Ph.D., *Founder and Vice President, Research*

Bryant Macy, *Vice President, Product Management*

Tuan Nguyen, *Vice President, Partner and Professional Services*

Sean Scott, *Senior Vice President, Commercial Operations*

Daniel Shiffman, *Senior Vice President, Engineering and Operations*

BOARD OF DIRECTORS

Jim Swartz, *Founding Partner, Accel Partners*

Mark Wan, *Founding Partner, Three Arch Partners*

John D. Diekman, Ph.D., *Founder and Managing Partner, SAM Ventures*

Kenneth Clifford, *Managing Director and CFO, Metalmark Capital*
