

## **Ingenuity Systems expands scope of licensing agreement with Daiichi Pharmaceutical Co., Ltd.**

**Redwood City, CA – April 25, 2006** – Ingenuity Systems today announced that they have expanded the terms of their existing agreement with Daiichi Pharmaceutical Co., Ltd. for access to the Ingenuity Pathways Analysis software.

Ingenuity Pathways Analysis (IPA) is a software application that enables researchers to model, analyze and understand the complex biological systems at the core of life science research. IPA is deployed in most major pharmaceutical companies and hundreds of biotechnology companies and academic institutions globally. It supports analysis of all high throughput analysis platforms and is used in virtually all areas of drug discovery and development from target identification and validation to biomarkers, predictive toxicology, and pharmacogenomics.

“Daiichi is one of the first Japanese Pharmaceutical companies to fully expand usage to a corporate-wide license and we are very pleased that Daiichi has decided to broadly deploy IPA across its discovery and development sites,” stated Peter DiLaura, Vice President, Sales and Customer Support. “The Ingenuity product line enables IPA users to understand complex biology within their research, in addition to supporting the Bioinformatics team to further develop robust and proprietary computational solutions.”

Ingenuity Pathways Analysis is available as a web-delivered, hosted, or deployed solution. Fully functional complimentary trials are available at [www.ingenuity.com/trial](http://www.ingenuity.com/trial).

### **About Ingenuity Systems®**

Ingenuity enables researchers to model, analyze and understand complex biological systems foundational to human health and disease. The Ingenuity products include pathways analysis software and knowledge bases for biologists and bioinformaticians, and enterprise knowledge management infrastructure, content and services for leading pharmaceutical and biotech companies. Ingenuity was founded in 1998 and is headquartered in Redwood City, California with offices in Germany, Switzerland, France, the United Kingdom, and Japan.
