Wyeth and Ingenuity Expand Relationship

Wyeth expands licensing of Ingenuity Pathways Analysis software and pushes to more areas of drug discovery and development

Mountain View, CA – February 2, 2005 - Ingenuity announced today that Wyeth Pharmaceuticals, Inc. (NYSE: WYE) has expanded its licensing of the Ingenuity Pathways Analysis software, and extended its use into new areas of therapeutic research. The latest release of the Ingenuity Pathways Analysis application provides a novel approach for scientists to compare and understand biological states, a critical capability for decreasing attrition and speeding time to market in pharmaceutical research and development.

"Wyeth has embraced pathways analysis software as an increasingly important element to successful therapeutic research and development," stated Jake Leschly, President and CEO of Ingenuity. "Ingenuity is pleased to be providing expanded access to Ingenuity Pathways Analysis to more Wyeth researchers, particularly downstream in the pharmaceutical value chain."

About Ingenuity Systems

Ingenuity Systems is helping life science researchers understand biological systems that are foundational to human health and disease. Ingenuity delivers systems biology expertise to biologists and bioinformaticians through pathways analysis software, genome-scale computable network databases, and knowledge management services and infrastructure, resulting in increased productivity and faster drugs to market. The company was founded in 1998 and is headquartered in Mountain View, California. For more information, visit us at www.ingenuity.com.
